

END OF LINE

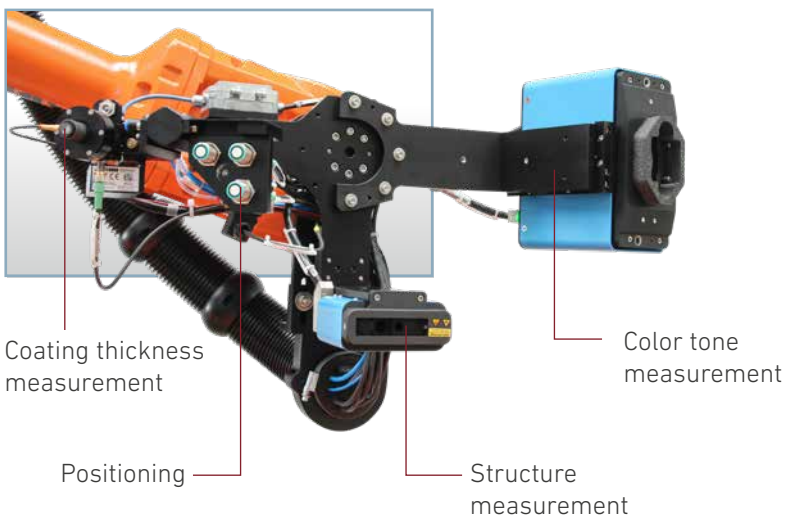

Fully automated End-of-Line measuring cell for structure, color tone and coat thickness measurement.

Advantages

- Higher quality of measured data by reproducibility in comparison to manual processes
- Equipped with different systems for coat thickness, color tone & structure
- Automatic data storage of individual measuring systems
- Availability of data for statistics & process optimisation

TRIPLE SENSOR HEAD

Simple statistics & process evaluation

Measured Data Monitoring & Evaluation

- Display of butterfly picture
- Display of the measured data
- Simple statistics and process evaluation
